Vasectomy Sperm Check

Procedure:

1. Sperm must be checked 2 months following the vasectomy. Patient must use other methods of birth control until check is completed.
2. Sperm checks must be done annually thereafter.
3. Patient must bring in a fresh specimen collected outside of the office in our plastic capped tube.
4. Patient must call and make sure that Dr. Eshenaur is in before bringing specimen in for a check.
5. When patient arrives, he must be brought in along with his specimen directly to Dr. Eshenaur. *The chart must accompany patient as well as LC.*
